

G CALENDAR

2019年10月10日 木曜日 13:38

Scenario

- User can add plans.
- User can have multiple calendars
- Users can subscribe public calendars
- Users can share calendars with

Estimation

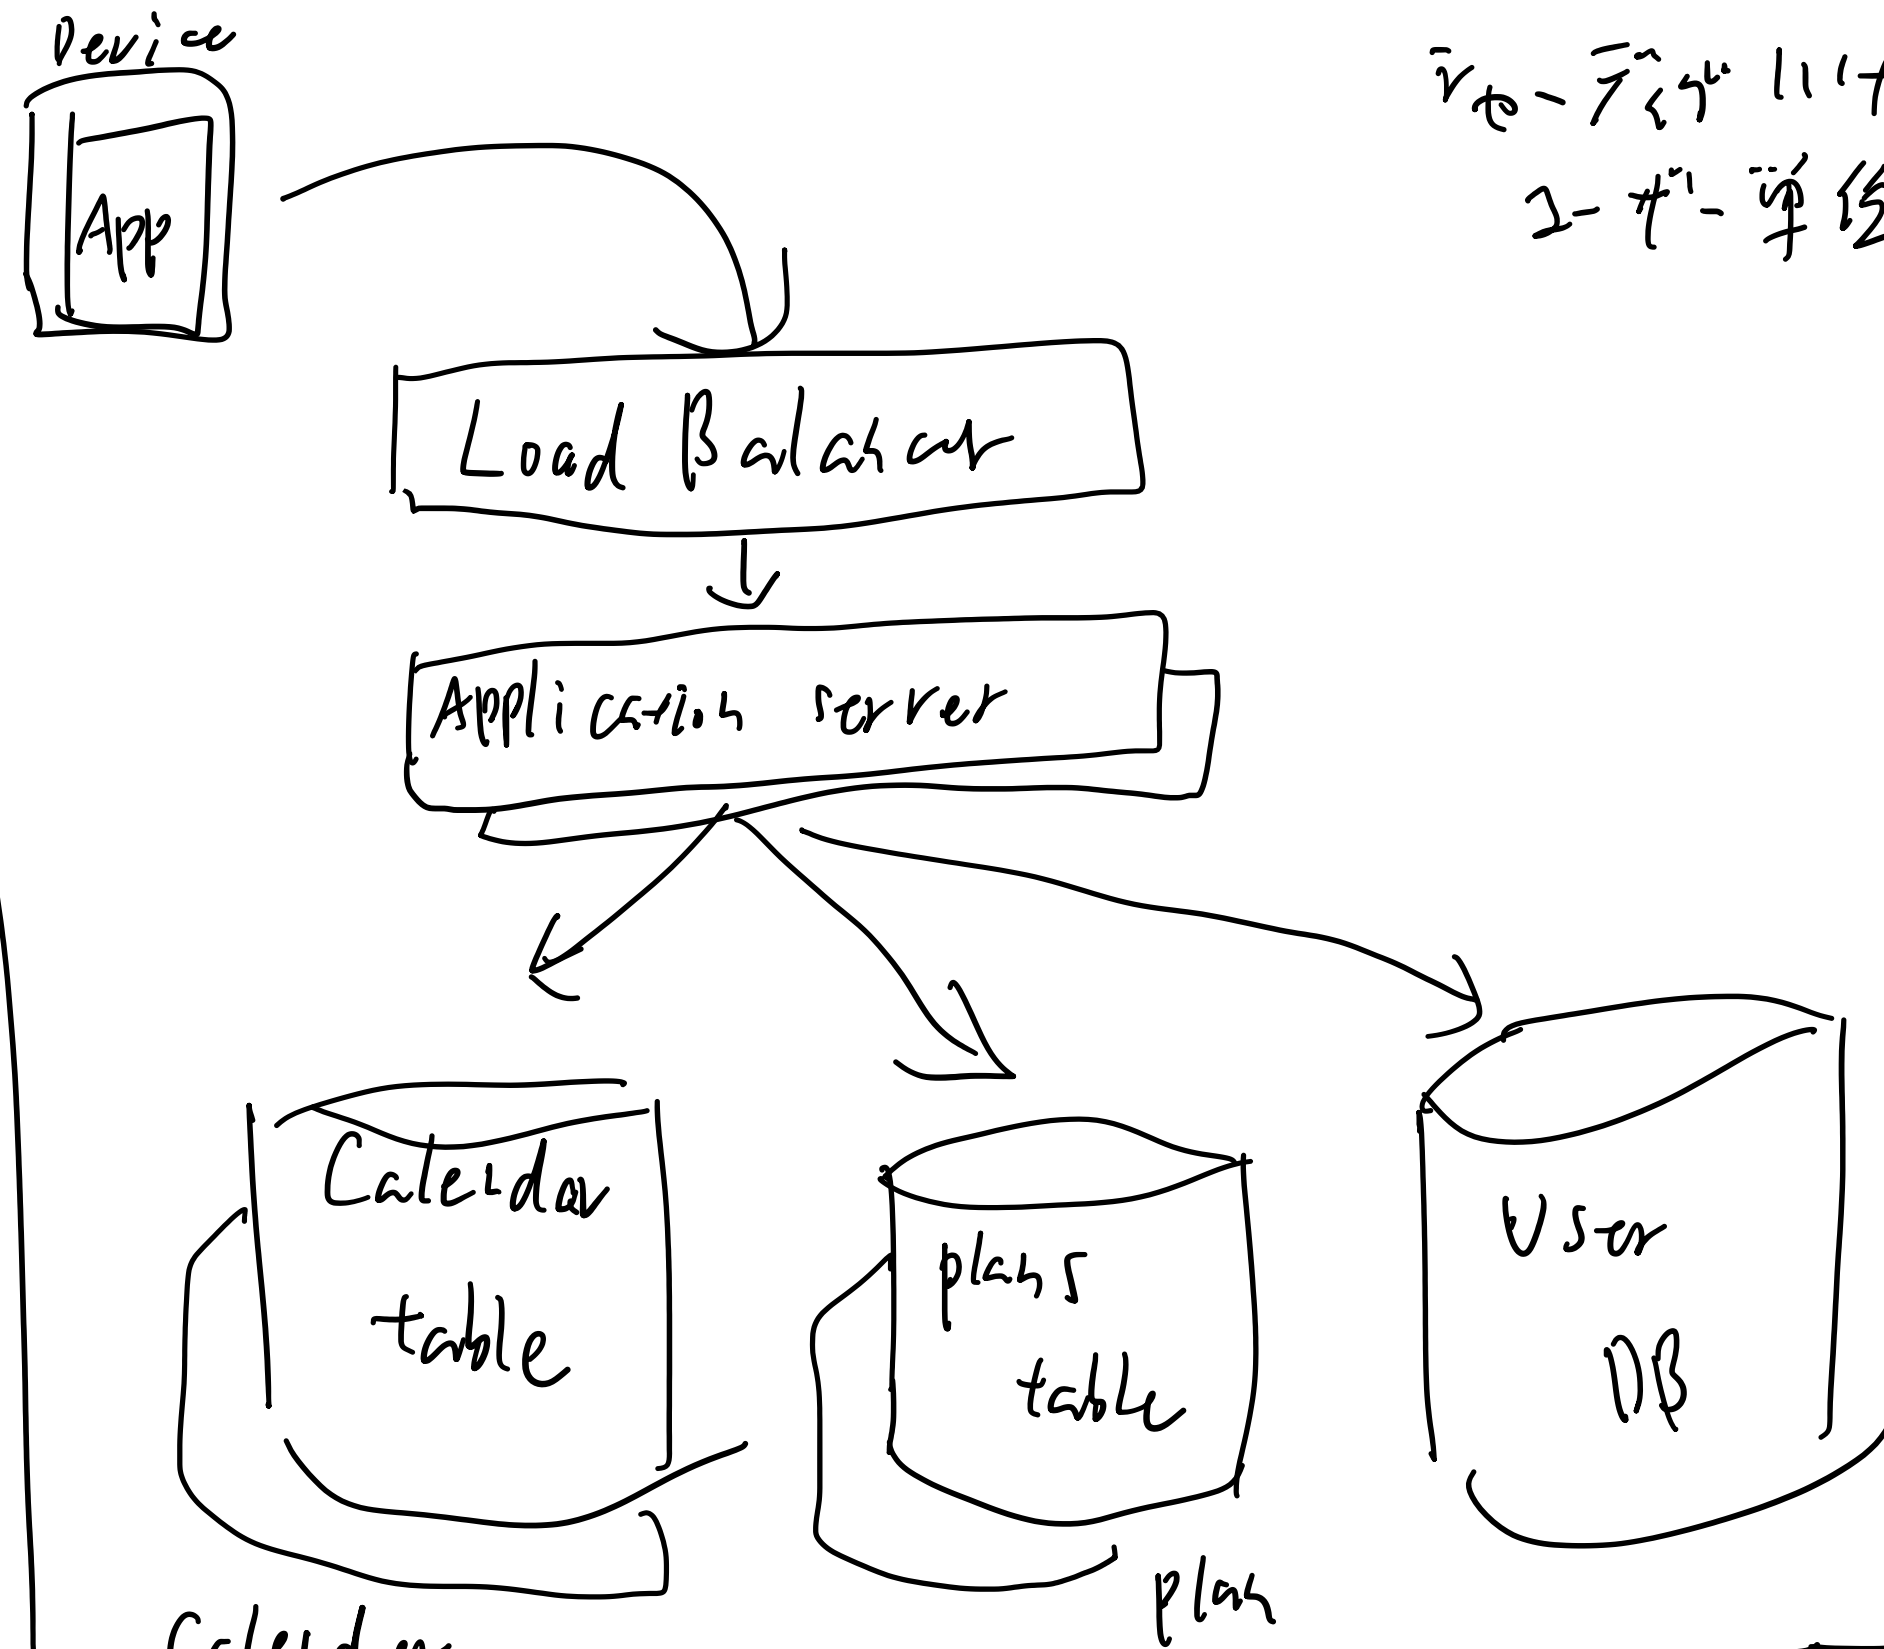

100M users, DAV ← sync calendars

1M users add plans
1 plan size
Date 8+8+20B
Title 40B
Memo 1KB.

1M / 8192000 = 100000
10,000 / 8192 ≈ 11 request/s write
1100 request/s Read

1MBX 1KB = 1GB/day

Req

カレンダーの管理
ユーザーの管理

User

id	name	mail

User - calendar

id	user-id	calendar-id

Allow

id	owner-id	calendar-id	allowed-user-id
